Hello!

This is a guide book about ~~Siberia~~ Russia. It's a 22nd century. Our government is organizing a lot of competitions all over the country. In our cities there are an holograms that work with software.

Our people ~~are~~ are fond of ~~travelling~~ traveling.

We can travel with fly trains that levitate under the road. Also we have very fast planes. For example we can go from Russia to Japan for a 2 hours.

What about working and studying. People can do it as they want. Teens can study at home, they can do homework in computer and send it to a teacher. And one more thing! In some schools robots work as teachers.

People can eat at the restaurants where robots cook all that person want. Also people can cook by themselves at their flats. (They of course have kitchen)

In their free time people can hang out at the park, they can go for clubs with VR games, computer clubs and so on.

We have a lot of beautiful streets, parks, monuments. You can see the technology cities; or old towns with no internet and where ^{never} wasn't no computer. In this towns there're only stone houses with 9 floors or wooden wittar villages and churches

We always wait ^{new} our guests to our country!
welcome!!!
